DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 69-114, drawn to system and method for providing real time ratings to user, classified in class 705, subclass 10.
 - II. Claims 115-126, drawn to system and method in which an interactive television program guide is implemented on user television equipment, classified in class 725, subclass 10.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the features of "displaying program guide display screens on the user television equipment with the interactive television program guide; means for receiving at least one user selection in the interactive television program guide which displays a program guide display screen...." can be used in interactive program guide device. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. A telephone call was made to attorney Kevin T. Roddy (Reg. No. 50,577) on November 26, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Son P Huynh whose telephone number is 703-305-1889. The examiner can normally be reached on 8:00-5:30.
